# Accounting, A.S.

[ind.tc/child-development-bs](http://ind.tc/child-development-bs)

Smart money management is crucial to a successful business. Accountants must ensure that businesses earn and spend money responsibly and ethically amid a complicated web of federal regulations and procedures. For those who love numbers, this is a welcome challenge. Indiana Tech's accounting program will refine your problem-solving skills and develop your understanding of the ethical and professional standards of modern accounting. Our associate degree in accounting also will prepare you to complete your bachelor's degree in accounting if you choose to do so.

As an accounting student, you'll benefit from faculty who know you by name. Our rigorous accounting program is led by Certified Public Accountants (CPAs) with both public and private sector experience. Our accounting faculty stays up-to-date in the profession as they attend conferences and actively serve on boards and committees in the community.

## Career Opportunities

Some career opportunities available to our graduates with an associate degree in accounting are:

- Management accounting
- Financial services
- Auditing
- Government and non-profit agencies
- Public accounting
- Taxation
